The Advanced Diploma in Environmental and Land Based Studies

Brief Course description

The Environmental and Land Based Advanced Level Diploma introduces key themes of related to the Environmental and Land Based industry. You will learn what the Environmental and Land Based industry is all about and examine the different opportunities it has to offer. As well as understanding the theory behind the Environmental and Land Based industry, you will learn practical skills and develop an ability to solve problems and work as part of a team. The course will open up a wide range of educational, training and career opportunities. You will also develop your English, Maths and ICT skills to a high standard.

You should consider this course if you would like:

- An alternative to an A Level programme
- A large qualification with a variety of units
- A course with practical and theoretical applications
- A broad understanding of the Environmental and Land Based industry
- A good progression route to higher level courses, including Degrees
- A course supported by industry and Higher Education
- A course with good employment prospects
- Experience of Further Education
- A significant amount of work experience

The Advanced Diploma in Environmental and Land Based studies is equivalent to 3.5 GCE A levels.

What will I learn?

You will study and experience the following **Principal Learning** topics:

- Ecology and Production
- Managing biological resources
- Environmental and land based enterprises
- Meeting the needs of land based enterprise
- Plants, animals and society
- Working safely and legally with plants and animals
- Sustainable development
- Research methods, skills and environmental analysis

Generic Learning

Here you will develop your skills in English, Maths and ICT (Functional skills) to a high level. You will also develop your personal learning and thinking skills (PLTS) and complete a project which demonstrates your skills and knowledge of the subject, for example, investigating the Environmental and Land Based industry through visits to employers, and working as part of a team in a realistic working environment. You will also be given the opportunity to study additional, specialist subjects to further extend the scope of your programme. This may include an A Level subject.

Where will I learn?

You will study both at school and at College. Also you will take part in visits to Environmental and Land based organisations.

You will be required to take part in a minimum of 10 days of work experience at an Environmental and Land Based employer, where you will gain valuable additional skills and knowledge, including interpersonal skills.

How will I be taught?

You will have opportunities to experience different styles of learning in different environments and with an emphasis on work related learning. Employers will set challenge projects and exercises that you will be able to complete individually or by working in a team.

How will I be assessed?

Most units will be assessed by your teachers and will be based on your practical, assignment and project work. Employers will also help to assess your work, particularly if they have set a project for you to complete. There will be one or 2 units where you will need to take an external test but the emphasis for the whole course is about continuous assessment by your teachers.

What can I do after this course?

The advanced level diploma is designed to broaden your horizons and give you a wide range of next step options. You may wish to take a Higher National Diploma or Foundation or First Degree course in Environmental and Land Based studies, or a related area. Alternatively, you may wish to seek employment at supervisory level.

The Environmental and Land Based Diploma has been carefully designed to give you relevant transferable skills that will be welcomed by colleges, universities and employers.

What is this course “worth”?

The Advanced Diploma in Environmental and Land Based studies is equivalent to 3.5 GCE A levels.
