

South Leicestershire Diplomas

The Advanced Diploma in Construction and the Built Environment

Brief Course description

The Advanced Diploma in Construction and the Built Environment introduces key themes related to the Construction and Built Environment industries. You will learn what the Construction and Built Environment industries are all about and examine the different opportunities it has to offer. As well as understanding the theory behind the Construction and Built Environment industry, you will learn practical skills and develop an ability to solve problems and work as part of a team. The course will open up a wide range of educational, training and career opportunities. You will also develop your English, Maths and ICT skills to a high standard.

You should consider this course if you would like:

- An alternative to an A Level programme
- A large qualification with a variety of units
- A course with practical and theoretical applications
- A broad understanding of the Construction and Built Environment industries
- A good progression route to higher level courses, including degrees
- A course supported by industry and Higher Education
- A course with good employment prospects
- Experience of Further Education
- A significant amount of work experience

The Advanced Diploma in Construction and the Built Environment is equivalent to 3.5 GCE A levels.

What will I learn?

You will study and experience the following **Principal Learning** topics:

- Design the built environment: design factors
- Design the built environment: stages in the design and planning process
- Design the built environment: physical and environmental influences
- Create the built environment: health, safety and environmental influences
- Create the built environment: management processes
- Value and use of the built environment: adding value to the wider community
- Value and use of the built environment: protecting and maintaining

Generic Learning – Here you will develop your skills in English, Maths and ICT (Functional skills) to a high level. You will also develop your personal learning and thinking skills (PLTS) and complete a project which demonstrates your skills and knowledge of the subject, for example, investigating Construction and Built Environment industry through visits to employers, and working as part of a team in a realistic working environment. You will also be given the opportunity to study **additional, specialist subjects** to further extend the scope of your programme. This may include an A Level subject.

Where will I learn?

You will study both at school and at College and at South Leicestershire's Skills Centre when it is complete. Also you will take part in visits to Construction and Built Environment organisations. You will be required to take part in a minimum of 10 days of work experience with an Construction and Built Environment employer, where you will gain valuable additional skills and knowledge, including interpersonal skills.

How will I be taught?

You will have opportunities to experience different styles of learning in different environments and with an emphasis on work related learning. Employers will set challenging projects and exercises that you will be able to complete individually or by working in a team.

How will I be assessed?

Most units will be assessed by your teachers and will be based on your practical, assignment and project work. Employers will also help to assess your work, particularly if they have set a project for you to complete. There will be one or 2 units where you will need to take an external test but the emphasis for the whole course is about continuous assessment by your teachers.

What can I do after this course?

The Advanced level diploma is designed to broaden your horizons and give you a wide range of next step options. You may wish to take a Higher National Diploma or Foundation or First Degree course in Construction and the Built Environment, or a related area. Alternatively, you may wish to seek employment at supervisory level.

The Construction and Built Environment Diploma has been carefully designed to give you relevant transferable skills that will be welcomed by colleges, universities and employers.

What is this course "worth"?

The Advanced Diploma in Construction and Built Environment is equivalent to 3.5 GCE A levels.

Entry requirements/skills needed

To be successful on the course, it is recommended you have GCSE's in 5 subjects, including Maths and English, at grade C or above. Of course, successful achievement of the Higher Level Diploma in Construction and Built Environment or equivalent qualification will be acceptable.

It is also very important that you have:

- A strong interest in the Construction and Built Environment industries
- A good attendance and punctuality record
- A good behaviour record
- Good literacy and numeracy skills

Employer links?

You will have the opportunity to visit, and/or attend work placement at a number of local Employers.
